Problem Statements

I created a problem statement to understand my customers perspectives and identify their needs more effectively.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS 1	A boutique business owner or social media manager	Create engaging Instagram captions to promote a new summer sunglasses collection.	It takes a lot of time to write creative captions and find suitable hashtags for every post.	Writing captions manually requires creativity and continuous research on current social media trends.	Tired and concerned that my posts may not attract enough audience engagement.

PS 2	An independent e-commerce content creator	Generate captions in different tones for multiple social media platforms.	Many AI tools generate captions that sound too generic and do not match the selected platform or audience.	Most tools provide limited customization for tone, style, and platform-specific content.	Frustrated because the generated captions do not reflect my brand's personality.
PS 3	A digital marketing agency copywriter	Generate high-quality captions quickly for different client campaigns.	Creating unique captions for multiple clients within a short deadline is difficult.	Manual content creation takes time and reduces overall productivity during busy campaigns.	Stressed about meeting deadlines while maintaining content quality for every client.
