

Project Demo Planning

Date	July7, 2026
Name	Khushboo Meena
Project Name	CaptionAI: AI-Powered Social Media Caption Generator

Project Demo Planning

The final project demonstration will briefly present the complete workflow of CaptionAI, including user input, AI-generated content, backend integration, and the application's key features within the allocated time.

S. No.	Feature to be Demonstrated	What Will be Demonstrated	Demonstrated By	Time Allocated
1	Project Introduction & Overview	Introduce CaptionAI, explain its purpose, target users, and supported platforms (Instagram, LinkedIn, and Twitter/X). Briefly describe the project structure, including folders such as templates , static , and important files like app.py , requirements.txt , .env , and .gitignore .	Khushboo Meena	1 min 30 sec
2	Application Execution & User Interface	Demonstrate how to run the Flask application using <code>python app.py</code> . Explain the home page, campaign description input box, platform selection, brand tone options, and the overall user workflow.	Khushboo Meena	1 min
3	AI Caption Generation	Enter a sample campaign description and generate captions for Instagram, LinkedIn, and Twitter/X using	Khushboo Meena	1 min 45 sec

		different brand tones. Show how the generated content changes according to the selected platform and writing style.		
4	Generated Output & Features	Display the generated captions along with hashtags, call-to-action suggestions, emojis, and demonstrate the Copy button for quick content reuse.	Khushboo Meena	30 sec
5	Deployment & Project Conclusion	Briefly explain how Ngrok is used to share the application online. Conclude the presentation by summarizing the technologies used (HTML, CSS, JavaScript, Flask, and Groq API) and the key benefits of CaptionAI.	Khushboo Meena	1 min

Total Demo Duration: 5 Minutes 44 Seconds

Demo Logistics

Item	Details
Demo Platform / Tool	The application will be demonstrated using the Flask web application running locally in Visual Studio Code and accessed through Google Chrome or Microsoft Edge.
Demo Date & Time	July 6, 2026

Recording / Demo Video Link	A complete demonstration video has been recorded successfully and will be submitted along with the project for reference. Video available at: https://drive.google.com/file/d/1XBF0lHL5a9QyvbFi1SlrDOrqzrPb2exZ/view?usp=sharing
Backup Plan	A backup copy of the complete project source code will be available on GitHub as well as on the local system. If any internet, API, or technical issue occurs during the demonstration, the locally running Flask application or the recorded demo video will be used to complete the presentation without interruption.
